

● MYSTIQ LABS • DISCOVERY CALL

Intelligent Document Processing & General Ledger Reconciliation

Automated CPA-grade extraction, multi-factor audit validation, and instant discrepancy resolution for tax workflows.

TARGET OUTCOME

**10x Capacity
Expansion**

ARCHITECTURE

**Zero-Persistence
Security**

VALIDATION

**3-Tier Audit
Logic**

Eliminating Manual CPA Data Entry

Traditional Manual Audit

70% Time Waste: Manual cross-checking of PDF tax forms against client ledgers.

Hidden Compliance Drift: Unnoticed TIN mismatches and tax year errors.

High Opportunity Cost: Senior staff stuck performing repetitive data entry.

Mystiq IDP Engine

Sub-15s Extraction: Rapid parsing of 1099, W-2, and K-1 documents.

Automated GL Matching: Instant reconciliation against general ledger records.

10x Capacity Growth: Redirect staff hours to advisory services.

Multi-Factor Reconciliation Framework

● GREEN • MATCH

Straight-Through Process

Zero monetary variance.
Recipient TIN confirmed.
Tax year perfectly aligned.

● AMBER • NOTICE

Compliance Flag

Monetary amount matches (\$0.00).

Secondary TIN mismatch detected.

Historical tax year drift flagged.

● RED • VARIANCE

Action Required

General Ledger variance exists.
Monetary discrepancy detected.
Routed to Exception Portal.

Privacy-First Memory Architecture & ROI

Transient Memory Processing

Tax documents are processed transiently in RAM with zero disk persistence.

Zero PII & TIN Retained

Social Security Numbers and Employer IDs are never stored or logged.

LIVE SYSTEM DEMO

Let's See the Audit Engine in Action

Switching over to live batch ingestion, dynamic customer grouping, and exception handling.
